[< Back to Surrogacy Journey Page](#)

Fees for Host Surrogacy Package	Cost (£)
Surrogate	
Consultation & Counselling	£250
Surrogate screening	£200
CMV	£85
Partner screening	£200
Surrogate drugs	£500 Approx.
Saline Infusion Sonogram	£495
TIA (consent signing appointment)	£125
Additional Fees	
Embryo glue	£295
Pregnancy scan	£200
Surrogate medication in pregnancy	£500 Approx.
Embryo Freeze	£865

Once eggs have been donated to and used by surrogate the cycle will be deemed to be complete. A refund of £250 will be paid if embryo transfer does not occur (e.g. if failure of eggs to fertilise or all embryos are frozen)

i

Embryo Glue is a specialised culture medium that is enriched with a naturally occurring substance called Hyaluronan. Hyaluronan is found throughout the body and is thought to be important in fertility as the levels of hyaluronan increase within the uterus around implantation.

If you chose to use Embryo Glue, this will be used instead of conventional culture medium at the point of embryo transfer. The embryo selected for transfer will be placed within the Embryo Glue ahead of transfer. You will not need to do anything differently during the embryo transfer process. There are no additional risks in the use of Embryo Glue further than those associated with routine fertility treatment.

Embryo Glue has been classed as an 'add on' by the HFEA. An 'add on' is a treatment that can be offered by a clinic which may not have enough evidence to show that it is effective at increasing the chances of having a baby (<https://www.hfea.gov.uk/treatments/treatment-add-ons/#What-are-add-ons>).

Each 'add on' is ranked according to the quality of evidence to support their use and Embryo Glue, along with other media containing hyaluronan, has been ranked as 'amber'. The HFEA acknowledge that there is one high quality study which supports that Embryo Glue may increase the chances of having a baby with fertility treatment whilst other studies are deemed to be of moderate quality and as such the use cannot be routinely recommended for all fertility patients (<https://www.hfea.gov.uk/treatments/treatment-add-ons/hyaluronate-enriched-medium/>).

Your Clinician and Embryology team will be able to give you further guidance should you wish to use Embryo Glue in your treatment.

Frozen embryo transfer to surrogate

Fees for Host Surrogacy Balance of Package	Cost (£)
Part 1 Embryo Creation	
Consultation & Counselling	£250
Anti-Mullerian Hormone (AMH) + Thyroid Function (TFT)	£125
